Select **Home** and look at the **Courses** tab
All of your courses will show here*

The screenshot shows the ANGEL Learning system interface. The 'Home' tab is selected in the top navigation bar. The 'Courses' tab is active in the main content area, displaying a list of courses: 'Online 101' (Role: Instructor, Instructor: Calvin Williamson) and 'PRACTICE COURSE SANCHEZFONG' (Role: Instructor, Instructor: Carmita Sanchez). The 'Courses Settings' dialog box is open, showing the 'Display Filter' section with checkboxes for 'FIT Basic Campus-Master Course' and 'PRACTICE COURSE RIMAN', both of which are checked. The 'Advanced Settings' section includes options for 'Group By' (Semester, Category), 'Also Display' (Role, Category, Instructor, Semester, Course Dates), 'Tasks' (Ungraded, Mail, Posts, Milestones, Tasks), and 'Show Disabled' (Yes, No). The 'Save' button is circled in blue. A yellow text box at the bottom of the screenshot provides instructions: '*If you do not see your requested courses on this page click the "edit" button just to the left of the "Courses" header and a list of those courses will appear, click on any of them to gain access, Select *YES to Show Disabled and Select Save.'

Congratulations, you're done.
