

How do I obtain my IP Address and Mac address?

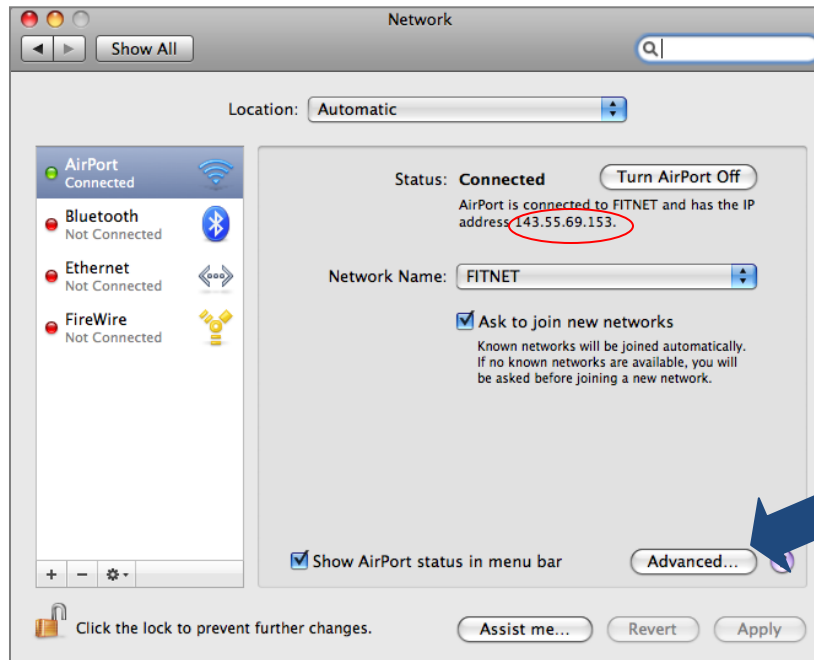

1. Go to the Apple Menu
2. Select System Preferences

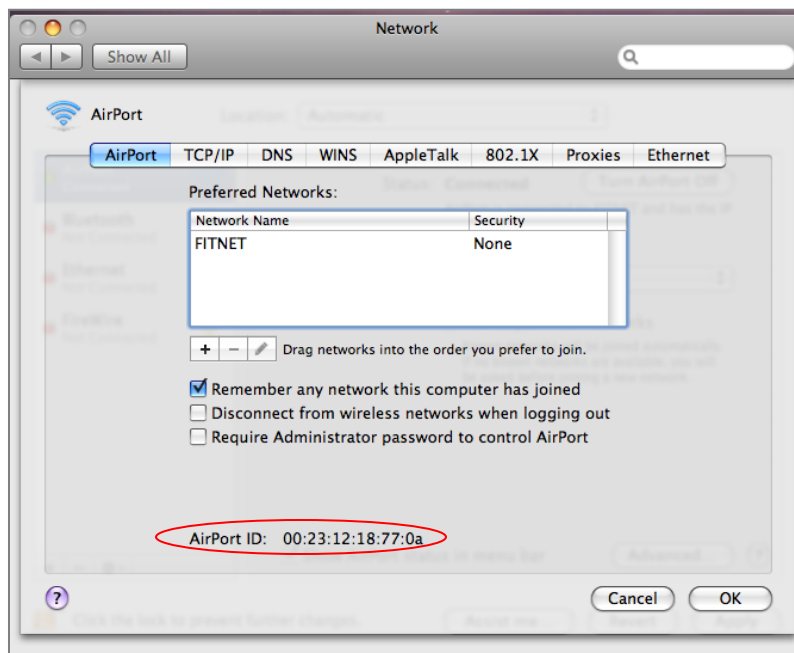

3. Click on Network

4. The box below will appear. Find your IP Address and write it down exactly as it appears, it has been circled in the image below. Now click advanced.

5. Find your Airport ID (this is your Mac Address) and write it down exactly as it appears. The Airport ID has been circled in the image below.

6. You may also obtain your IP Address by selecting “TCP/IP” (See image below).
